Assignment – 17

Constraining the Values of your data.

1) Create the Orders table so that all onum values as well as all combinations of cnum and snum are different from one another, and so that NULL values are excluded from the date field.

```
D3_93068_Pankaj>create table new_orders(
    -> onum int primary key,
    -> amt float,
    -> odate date NOT NULL,
    -> cnum int,
    -> snum int,
    -> constraint u_snum_cnum UNIQUE (snum,cnum));
Query OK, 0 rows affected (0.10 sec)
D3_93068_Pankaj>desc new_orders;
          Type
                         Key Default
                                          Extra
  Field
                  Null
          int
                   NO
                          PRI
                                NULL
  onum
  amt
          float
                   YES
                                NULL
  odate
          date
                  NO
                                NULL
          int
                   YES
                                NULL
  cnum
          int
                  YES
                          MUL
                                NULL
  snum
 rows in set (0.04 sec)
```

2) Create the Salespeople table so that the default commission is 10% with no NULLS permitted, snum is the primary key, and all names fall alphabetically between A and M, inclusive (assume all names will be uppercase).

```
3_93068_Pankaj>create table new_salespeople(
   -> snum int primary key,
   -> sname varchar(30) check(sname >= 'A' and sname <= 'M')
   -> city varchar(15),
-> comm float NOT NULL default 0.10);
uery OK, 0 rows affected (0.07 sec)
3_93068_Pankaj>desc new_salespeople;
                        Null | Key | Default |
 Field |
         Type
                                                 Extra
 snum
         int
                         NO
                                PRI
                                       NULL
         varchar(30)
                         YES
                                       NULL
 sname
         varchar(15)
 city
                         YES
                                       NULL
         float
                         NO
                                       0.1
 comm
 rows in set (0.00 sec)
```

3) Create the Orders table, making sure that the onum is greater than the cnum, and the cnum is greater that the snum. Allow no NULLS in any of these three fields.

```
D3_93068_Pankaj>create table neworders(
    -> onum int primary key not null,
    -> amt float,
    -> odate date,
    -> cnum int not null,
    -> snum int not null,
    -> check( onum> cnum and cnum >snum));
Query OK, 0 rows affected (0.07 sec)
D3_93068_Pankaj>desc neworders;
 Field
          Type
                  Null
                         Key | Default
                                         Extra
          int
                  NO
                         PRI
                               NULL
 onum
         float
                               NULL
 amt
                  YES
                               NULL
 odate
          date
                  YES
                               NULL
          int
                  NO
  cnum
                               NULL
          int
                  NO
  snum
5 rows in set (0.00 sec)
```
